Registration & Timetable (CSC, Math, & Physical Sciences)

CLAUDIA LI TANG
INNIS COLLEGE REGISTRAR’S OFFICE
JUNE 2018
In this session we will cover ... 

- Overview of Key Steps and Dates for Registration
- Patterns in some required first-year Math & Physical Science programs
- Strategy for choosing your first-year courses with focus on CSC, Math, & Physical Science student
- Making your timetable
- Important dates & completing registration
Key Dates for Registration

- Attend an Academic Orientation Session
- Select your first-year courses and make your timetable
- **20 July** - Check your start time for enrolling in courses via http://www.acorn.utoronto.ca/
- **26 July** - Enrol in courses at your start time on ACORN
- **29 August** – Payment of first instalment of fees or deferral of fees due (if getting OSAP/other student loan/scholarship)
- **6 Sept** - Classes begin
- Refer to the Arts Science website – course timetable - important dates.
Patterns in required first-year Math & Physical Science courses

Actuarial Science: **MAT137Y (63%)/MAT157Y (60%)**: MAT223H/MAT240H; (STA130H, CSC108H) complete by end of Fall 2\textsuperscript{nd} year. ECO101H, ECO102H if pursuing SPE ACT

Astronomy and Physics SPE: **MAT135H, 136H/MAT137Y/MAT157Y**: PHY131H, 132H/PHY151, 152H

Computer Science: **MAT135H, 136H/MAT137Y/157Y**: CSC(108H, 148H)/150H +CSC165H/240H (Ave. CSC148H+165H MIN. 70% in each, Ave. was 83% in 2017)

Chemistry: **MAT135H, 136H/137Y/157Y**: CHM135H, 136H/ CHM151Y min. 63%; SPE requires PHY131H, 132H

Geophysics: **MAT135H, 136H/137Y**: PHY131H/151H, PHY132H/152H

Statistics: **STA130H, CSC108H, MAT135H, 136H/137Y/157Y; MAT223H/240H** is strongly recommended to be taken in 1\textsuperscript{st} year

Visit departmental websites for more detailed program/course information and guide - **CSC, MATH, STA, CHM, PHY, ESS** (incl. Geo Science).
Get to know course variants

- Options in courses separated by a slash (/) could mean courses that cover roughly the same ground but with different levels of intensity and depth – i.e. difficulty.

- Keep in mind you may discover some old codes for courses. These are for upper-year students’ reference. E.g., MAT135Y, was replaced by MAT135H & MAT136H. Some new, notable codes this year: CHM135H, Chemistry: Physical Principles (formerly CHM139,) and CHM136H, Introductory Organic Chemistry (formerly CHM138H).

- Read the course title/description to ensure you are taking the right course; i.e. avoid accidentally taking the PHY100H1 “Magic of physics” instead of PHY131H1 Intro to physics for the major in Physics.
The MAT variants

- **MAT135H + 136H (formerly MAT135Y)**
  Basic level first-year calculus, useable for pretty much all life science programs and more applied MAT programs.

- **MAT138H**
  Good preparation for MAT137Y, MAT237Y, MAT240H and other proof-oriented course.

- **MAT137Y**
  Tougher calculus – more analytical. Programs needing that analytical. A good foundation for physical Sciences.

- **MAT157Y**
  The toughest one: very analytical and theoretical. Really only ever required for intensive MAT programs.
The CSC variants

- It's like language study: you can skip ahead if you have prior experience/fluency. See Notes below or CSC website.

### CHOOSING YOUR FIRST YEAR COURSES

This page will help you choose your first-year computer science courses whether you plan to enrol in a computer science program, are taking CSC courses to fulfill requirements for a different program, or just want to take a course or two to learn a bit about computer science.

If you have further questions, please contact our Undergraduate Office (ug@cs.toronto.edu) for advice.

### If you might want to study computer science in a Major or Specialist Program

Here are two typical first-year schedules for students intending on studying computer science.

<table>
<thead>
<tr>
<th>Do you have little or no programming experience?</th>
<th>Do you have programming experience roughly equivalent to CSC108H1?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall 2018: CSC108H1</td>
<td>Winter 2019: CSC148H1 and CSC165H1/CSC240H1</td>
</tr>
<tr>
<td>First-year calculus: MAT137Y* or MAT157Y* or (MAT135H and MAT136H)*</td>
<td>First-year calculus: MAT137Y* or MAT157Y* or (MAT135H and MAT136H)*</td>
</tr>
<tr>
<td>Three additional half courses (or the equivalent).</td>
<td>Two additional half courses (or the equivalent).</td>
</tr>
</tbody>
</table>

*Students are strongly encouraged to take MAT137Y or MAT157Y as they have been determined to provide the best preparation for upper-year courses in computer science and benefit students in CSC165H1/CSC240H1.*

**Note:** grades in CSC148H1 and CSC165H1/CSC240H1 are used for admission to Computer Science Programs of Study. Please consult Admission to a Program for more information.
Examples of other variants

**CHM151Y vs CHM135H and CHM136H.** CHM151Y is for students pursuing a chemistry specialist (including Biological Chemistry and Environmental Chemistry) or including a substantial amount of chemistry in their programs, e.g. Chemistry Major (recommended).

**Statistics:** Different levels are distinguished by mathematical demands. The higher the level, the more rigorous the mathematical component is.

**STA220H +221H:** Good for most purposes. Pre-req: Grade 12 math and one course in physical, social or life sci.

**STA237H+238H:** Strongly recommended for students pursuing Statistical Sciences. Use of Computer simulation. Pre-reqs: MAT135H, 136H.

**STA247H+248H:** Stats for Computer Science. Pre-reqs: MAT135H, 136H; CSC108H/148H.

**STA257H+261H:** Stats for Actuarial Science, Stats Specialist. Co-req: MAT235Y, MAT223H.

See also other required courses for other Disciplinary Focuses.

Note: STA220H +255H, STA237H + 238H not accepted in lieu of ECO 220Y/227Y/STA257H,261H requirement for SPE Economics.
Pre-University courses

- **Preparing for University Mathematics Program (PUMP)**
  A non-credit course that provides the necessary foundation and better insight into which first-year math courses to choose and be generally better prepared for university math courses.

- **Introduction to Kinematics – Prof. Jason Harlow**
  A free online non-credit course. Intended for science students who need to take PHY131H but have not taken grade12U physics in high school.
Final Thoughts on variants

- Don’t take a more advanced variant unless you are sure it is what you need or are very keen and capable.
- Get advice from the experts: the departments are there to help!
- Instructions are on Department’s Website, Calendar, or Course Timetable.
- Some *drop down* options will exist for certain courses.
Choosing your first year courses and Enrolment Requirements

Taking a closer look at Enrolment Requirements for Major in CSC.

Enrolment Requirements:
(Note: the following enrolment requirements will apply for students enrolling in the 2019 enrolment period. Students enrolling in the 2018 enrolment period should consult the 2017-18 Calendar. Please refer to the Department of Computer Science for more information.)

This is a limited enrolment program (Type 2L) that can only accommodate a certain number of students. Eligibility is based on the following criteria:

A. Completion of at least 4.0 FCEs including CSC148H1 (with a minimum grade of 70%) and CSC165H1/ CSC240H1 (with a minimum grade of 70%), AND
B. An average of the grades in CSC148H1 and CSC165H1/ CSC240H1 that meets the department's annual cutoff. CSC240H1 grades will be adjusted to account for the course's greater difficulty. Note that the cutoff changes from year to year, depending on the current capacity of the program and the pool of applicants. For more information, including historical data, please visit http://web.cs.toronto.edu/program/ugrad/admission.htm.

Note:
- Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.
- 100-level courses repeated as “extra” credits are not considered for program admission if a student has already passed 200-level CSC courses. For more information about repeating courses for admission to Computer Science, visit http://web.cs.toronto.edu/program/ugrad/admission.htm.

Completion Requirements:
(8.0 full course equivalents [FCEs], including at least 0.5 FCE at the 400-level)

First year (2.5 FCEs):
1. CSC108H1, CSC148H1, CSC165H1/ CSC240H1; MAT137Y1/ MAT157Y1/( MAT135H1, MAT136H1)

Notes:
- Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. [There is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on “saving” a half-credit]
Choosing courses example: **Actuarial Science Major** (Science Program)

---

**Actuarial Science Major (Science Program) - ASMAJ0608**

---

**Enrolment Requirements:**
(Note: The following enrolment requirements will be in effect for students enrolling in Spring 2019. For students enrolling in the Spring 2018 enrolment period, consult the requirements stated in the 2017-18 Calendar.)

This is a limited enrolment program. All students who request the program and obtain at least the specified mark(s) in the required course(s) will be eligible to enrol. Courses required in either the major or specialist programs in actuarial science may not be taken as CR/NCR.

Required courses: **MAT137Y1** with a final mark of at least 63% or **MAT157Y1** with a final mark of at least 60%. **Note that the Mathematics Department enforces MAT223H1/ MAT240H1 as a prerequisite for MAT237Y1.**

**Completion Requirements:**
(Note: The following completion requirements will be in effect for students enrolling in Spring 2019. For students enrolling in the Spring 2018 enrolment period, consult the requirements stated in the 2017-18 Calendar.)

(8.5 full courses or their equivalent)

First Year:
1. **MAT137Y1** (63%)/ **MAT157Y1** (60%)
2. **MAT223H1/ MAT240H1** (should be taken in first year, enforced as a prereq for **MAT237Y1**)

To be completed before the end of Second Year:
3. **STA130H1** (students should complete this course by the end of the Fall Semester of Second Year)
4. **CSC108H1/ CSC120H1/ CSC121H1/ CSC148H1**

Higher Years:

---

**Note:** SPE requires ECO101H, ECO102H in first year.
Key Strategies for choosing courses (review)

- Familiarize yourself with the Calendar and the programs you want.
- Pick the first-year required courses.
- Review prerequisites, co-requisites, exclusions. Make sure that prerequisites are in the correct term.
- Choose electives.
- Check Timetable, balance course load: 5 courses per term. Note that there is a term load limit of 6 courses (not advisable anyway).

- Consider enrolling in a First-Year Learning Community program (FLC) –FLCs in Actuarial Science, Computer Science, and Math in 2018-2019. The deadline is 13 July.
Electives

- Refer to courses you do outside your key areas of study.
- If you would like to take to 5.0 FCEs, you will have the room for electives.
- Follow interests: What do you like reading up on? What would you like to explore? Languages, film, literature, world culture/religion, political science, economics, history...
- Consider courses you may take to fulfill your Breadth Requirements.
- An elective *could* lead to a program.
The 199 Seminars and First-Year Foundations aka “Ones”

- These are special options for first-year students
- Count for credit like any other courses but do not count toward any program— a pure “elective”
- **199 Seminars:** Courses are small classes (max. 24), organized according to breadth category, e.g. CCR199H, TBB199Y, SII199H. Encourage the development of critical thinking, writing, oral presentation, and research skills. Great opportunity for close interaction with professor and classmates.

- Enrol max. of 1 FCE in your 1st year.
- **First-Year Foundations:** Also known as “Ones.” Courses offered by the Colleges are designed to help transition to university life. Small dynamic classes allow you to network with peers, mentors, and professors, and explore a broad range of compelling issues. E.g. Innis One: The Creative City. Themes often relate to the programs housed at the college. [Apply online](#). Some are still open.
Now that you have selected your courses, including electives, we can proceed to make a timetable...

GO TO 2018-2019 FALL/WINTER TIMETABLE LISTINGS >
HTTP://WWW.ARTSCI.UTORONTO.CA/CURRENT/COURSE/TIMETABLE
2018 - 2019 Fall & Winter Session Timetable

Be sure to enrol in all courses on ACORN | Arts & Science Calendar
Registration Instructions | UTSC | UTM | St. George campus map
Music Courses | Faculty of Applied Sciences and Engineering | Visual Studies and Architecture Courses

Department(s)
- Example: select Anthropology or type at least the first 3 characters. You can select up to 3 departments.

Course Code
- Type a Course Code
- Example: ANTH 101 or at least the first 3 characters

Session(s)
- Example: F (Fall), S (Winter), Y (both sessions) which refer to term

Course Level(s)
- Courses will be shown based on year(s) selected

Day(s) of Week
- Limit your schedule by specific day(s) of the week

Instructor's Last Name
- Enter the last name
- Enter any part of the last name. Please be aware that instructor(s) details may change

Time(s)
- Limit your schedule to time of day, for example Morning

Breadth Requirement(s)
- Specify your degree breadth requirements

Online Courses
- Search for courses that are only offered online

Courses with Wait List Option
- Search for courses that have a wait list option available if the course becomes full

Meeting Sections with Space
- Search for meeting sections that have space available for enrolment

Course Title
- Enter course title or subtitle
- Enter any part of the course title or subtitle
Courses have a “section” code – telling you in what part of the academic session the course is offered.
Create a plan for My Timetable
REMINDER: You MUST enrol on ACORN to be registered for a course. This is not an official timetable.

<table>
<thead>

**Enrolment Controls:** Priority (P)

Priority enrolment is given to the groups of students listed below until August 2. There is no course enrolment on August 3. Beginning August 4, all other Arts & Science students can enrol in this section. UTSC/UTM students can enrol in this section starting August 11.

The following groups of students are given priority access until August 2:
- Year 1 COMPUTER SCIENCE (Faculty of Arts and Science)
- Year 1 SOCIAL SCIENCES (Faculty of Arts and Science)
- ACSRMP51 A&S Y1 Math & Phys Sciences - Year 1
- ASPRGMPS1 A&S Y1 Math & Phys Sciences - Year 1

**Enrolment Controls Legend**

- **P**: Priority: Some students are given priority access until a specific date.
- **E**: Enrol at Department: Students must contact the sponsoring Department to enrol.
- **AE**: Department Approval Required: Students must request enrolment on ACORN and await Departmental review of their request.
- **PE**: Priority, then Enrol at Department: Some students are given priority access until a specific date, after which time another group of students is also able to enrol by contacting the sponsoring Department.
- **R1**: Restricted: Course/section is restricted at all times for specific students.
- **R2**: Restricted: Course/section is restricted to a group of students until a specific date, after which time another group of students is also able to enrol.
There are 8 LEC Sections. Choose One. Watch Enrolment Controls.

</table>

There are over 35 tutorials sections. Choose One.
Practical Sections (aka labs)

**PHY131H1-F**  Introduction to Physics I

**Note:** For PHY131H1F: All term tests will be held on a Tuesday from 6:00 to 8:00pm. The precise dates will be confirmed on the Quercus course site in early September. Students should try to avoid scheduling tutorials/practicals in other courses in that time slot. If a conflict is unavoidable, students should be available Tuesdays 4:00 to 6:00pm. To write at the alternate sitting, BIO120 students who wish to register in a Tuesday evening lab section should select the one at 6:00pm so as to be able to write at the PHY131F alternate sitting of tests. Practicals meet every week. Students cannot alternate their practical, on the same day, with any 100-level BIO or CHM course lab. Students may add or change a practical (P) section using ACORN until September 18. Starting September 19, adding or changing Practical sections must be requested online at http://www.physics.utoronto.ca/students/undergraduate-courses/practical-sections-forms. Students who find that all Practical sections consistent with their course schedule are full should still register in a lecture section, with the understanding that they can request a section change after September 18 if no spot has become available in the meantime.

</tr>
</tbody>
</table>
Timetable will be updated on the web and ACORN with locations of classes in late August. See [Building codes & map](#).
Waitlists

- Not all courses have a waitlist (but most do). This is indicated by a “Y” or “N” in the waitlist column in the Timetable.
- Waitlists are available for lecture sections only.
- When a space comes up, students are added automatically, and waitlist moves “up.”
- Notification of being added to courses, like all emails, can get lost – check ACORN regularly.
- You can “waitlist” up to 2.0 credits; they count towards enrolment limit.
- Eventually waitlists are turned off: Waitlists for “F” and “Y” courses end 15 September and for “S” courses 14 January at end of the day.
Course selection & making a timetable: Step 1 - make a list of courses

- Main area of interest: Computer science
- Other areas: Statistics, Linguistics, Cognitive Science

CSC first-year required courses:

- CSC108H F
- CSC148H S + Tut
- CSC165H S
- (MAT135H +136H)/137Y* + T

Room for 2.5 ELECTIVES out of 3.5 Potential Electives:

- COG250Y, M3-6, + T, BR=2
- CCR199Y L5071 You are what you eat * 4 Aug., BR=1
- CCR199YLO331 There and Back Again: Exploring Tolkien *Conflict
- PSY100H F/S, BR2
- LIN200H1 F/S+T, BR=2
- SCII199H1F, L0401, W10-12, How to study in everyday life, BR=3, *

Note: If you would like to take two First-Year Seminars with the same course designator, i.e. CCR, TBB, etc. in the same term, you must enroll in one course and then email the First-Year Seminar Office to put you in the second.

*Note that some foci in CSC, e.g., Theory of Computation, require MAT137Y. As would also, e.g., Stats Specialist. Remember that if MAT237Y is required in second year, MAT223H is a prerequisite and so must be taken in first year.
Course selection & making a timetable:
Step 2 – plot them into an excel sheet or use the Timetable Add to Plan tool to make a schedule.

### Create a plan for My Timetable

**REMINDER:** You MUST enrol on ACORN to be registered for a course. This is not an official timetable.

#### Fall (F) Semester 2017

REMEMBER: You MUST enrol on ACORN to be registered for a course. This is not an official timetable.

You are responsible to ensure that there are no time conflict. ACORN will allow you to enrol in conflicting courses!
Final Check: Balanced course load on BOTH terms?

1st term
- MAT137Y1Y
- CSC108H1F
- LIN200H1F
- COG250Y1Y
- CCR199Y1Y-L5701

2nd term
- MAT137Y1Y
- CSC148H1S
- CSC165H1S
- COG2501Y
- CCR199Y-L5701

Total: 5.0  5.0
Important notes

- Be aware that prerequisites and co-requisites and exclusions are **not checked by ACORN in real time**, but they will be checked at a later date by the relevant department. You may be removed from the course at any time.

- ACORN will notify you if you enrol in courses with a time conflict but will not stop you. Check to avoid course time conflict.

- Dates with **no course enrolment**: 2, 7, and 9 August.
What is “registration”? 

Course Enrolment + Paying OR deferring fees (100% Fall Term Fees or online fee deferral) = REGISTRATION

DEADLINE 
29 AUGUST
Notes about fees

► View Invoice on ACORN.
► If you are taking 4.0 – 6.0 FCEs you pay a “program” fee (flat fee); that fee is roughly equal to 5.0 credits.
► Fee Schedule and instructions on how to pay
► If you do not pay or defer your fees by the deadline of 29 August, you run the risk of being removed from your classes. Once removed there is no guarantee for space availability and a late registration fee ($61) will apply.
Up next – Lunch!

Take a minute to review the 3 courses you wanted to take.

What’s next?

- Connect with new friends, upper-year students, and faculty members.
- Orientation Week information from the Innis College Student Society (ICSS) at lunch.

More Questions?

- You are welcome to email registrar.innis@utoronto.ca or call 416.978.2513 to book an appointment with an academic advisor.
- Check out UofT StarterKit info videos.
